

Liftlog™

Load Cell Bundles

What is Liftlog™?

Liftlog™ is a remaining life and load limiting datalogger for cranes. It works like a black box flight recorder and logs the date, time, duration and hook load for every hoist operation for the life of the crane (1.2 million entries). You can install Liftlog™ in parallel with an existing load limiting/indicating system, or as a stand-alone device. Commissioning and data download is wireless via a Bluetooth PDA.

The Liftlog™ reporter software takes the downloaded data and applies AS1418.1 to calculate the remnant life of the crane. With Liftlog™ you can dramatically extend the time between overhauls for lightly or seldom used cranes, or identify cranes that, due to overuse, will prematurely wear out! You can also identify overloads, shock loads and patterns of poor use.

For more details, including technical specifications see www.liftlog.com.au.

Price: \$1100 AUD + GST

Don't have a load cell? No problem. Check out our 3T and 5T bundles!

These bundles include rope clamps that are rugged, quick to install and accommodate ropes from 6 to 22mm in diameter.

3T Load Cell Bundle

1 Liftlog™ unit + 1 3T load cell

This load cell can be attached to 6-12mm wire ropes and detects loads of up to 3T per rope fall.

Special Bundle Price: \$1300 AUD (+ GST)

5T Load Cell Bundle

1 Liftlog™ unit + 1 5T load cell

This load cell can be attached to 12-22 mm wire ropes and detects loads of up to 5T per rope fall.

Special Bundle Price: \$1300 AUD (+ GST)
